Max. rpm:12,000rpm

Grinding stone size : 125 \$\phi mm x hole 22 \$\phi mm

Accessories : 5" Disc (1), Pin spanner (1), Hex. wrench (1), Safety instructions (1)

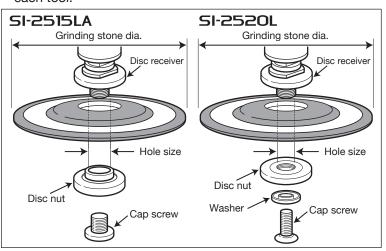

Max. rpm:12,000rpm Grinding stone size :

 $125\phi$  mm x hole  $22\phi$  mm

## **INSTRUCTION MANUAL FOR 5" DISC GRIND**

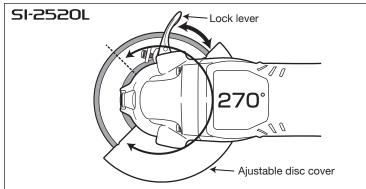

### **Operation Procedures**

- 1.Connect the coupler to the air inlet **1** on the rear side of tool.
- 2. Make sure the disc cover **2** is firmly mounted in place. Make sure the diameters of the grinding stone and the hole are suit each tool.

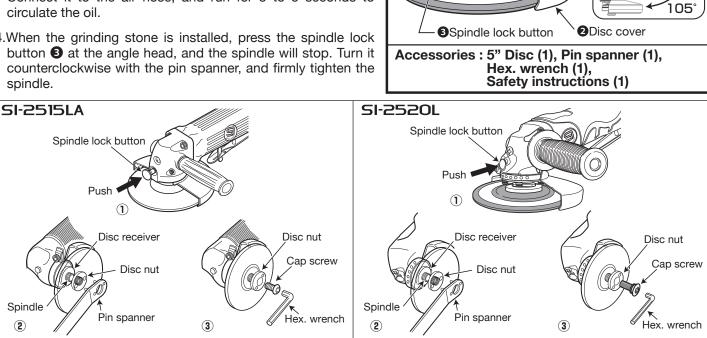

• Adjustable disc cover can be moved with turning to right/left.

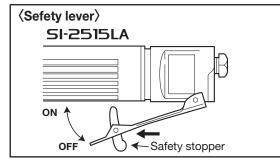

Before use, make sure the adjustable disc cover is firmly locked to the tool in position.

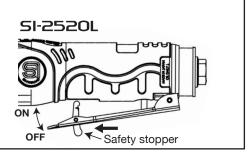

- 3. Pour approx. 0.5cc (2 to 3 drops) of the oil through the coupler. Connect it to the air hose, and run for 3 to 5 seconds to circulate the oil.
- 4. When the grinding stone is installed, press the spindle lock button **3** at the angle head, and the spindle will stop. Turn it counterclockwise with the pin spanner, and firmly tighten the spindle.

5. The start switch is a safety lever **④** with safety stopper. The safety lever will be locked automatically. Press the safety stopper to release the lock.

#### SI-2515LA / SI-2520L

Model Number	Disc Size mm	Spindle Size	Free Speed Max•rpm	Out Put Watt	Weight kg/(lb)	Noise Level dBA/(power)	Vibration a/k m/s²	Avg.Air Consumption CFM
SI-2515LA	125 (5″)	M14×2	12,000	570	1.93 (4.27)	85/(96)	11.0/(3.6)	2.8/(1.3)
SI-2520L	125 (5″)	M14×2	12,000	610	1.85 (4.07)	76.4/(87.4)	1.56/ (0.51)	2.8/(1.3)

Noise levels according to ISO 15744:2008, ISO 11203:2009

Vibration level according to ISO 28927

### 抢 WARNING

- Never use the edge of grinding stone.
- Never use without the disc cover.
- Never install the grinding stone where failure such as breakage, abnormal abrasion, crack, and chip has been found.
- Confirm operations within the maximum circumferential speed and rpm, as indicated on the grinding stone.
- Before use, make sure the grinding stone is firmly installed to the tool in place and no misalignment.

## 

- Careless drop of the tool will result in damage of the tool or components. Therefore, be sure to politely handle the tool.
- Operate the tool within the air pressure of 0.63MPa (6.5kg/cm<sup>2</sup>). If operated in high pressure, the maximum allowance speed will be exceeded, which may result in damage of components.
- Before or after daily use, lubricate a few drops of air tool oil from the hose attached port.
- The compressed air containing dust or/and moisture will result in damage of tool. Be sure to operate the tool with air through the drainage and air filter.
- If revolution failure or/and irregular noise occurred, do not continue operation furthermore. Forced operation of tool may result in serious troubles.
- Regarding to this product, if inconvenient claims or troubles occurred, contact the product distributor.
