

SHINANO INC. Environmental Policy

At our company, we are committed to contributing to the realization of a sustainable society by ensuring all employees are informed of, understand, and cooperate with our environmental policy. Through the continuous improvement of our environmental management system, we promote environmental protection activities and fulfill our social responsibility.

1. Compliance with Laws and Regulations

We comply with environmental laws, regulations, and other relevant requirements.
We regularly collect information on legal revisions and respond promptly.

2. Reduction of Environmental Impact

We promote the reduction of energy consumption in our manufacturing processes.
We minimize waste generation and encourage recycling.
We work to reduce the use of hazardous materials and consider the introduction of alternative materials.

3. Sustainable Resource Use

We strive for the efficient use of resources and promote the introduction of renewable energy.

4. Environmental Education and Awareness

We provide environmental education to all employees to raise awareness of environmental issues.
We ensure that all employees are informed of the environmental policy and goals and seek their understanding and cooperation.
